

Managed App Distribution program

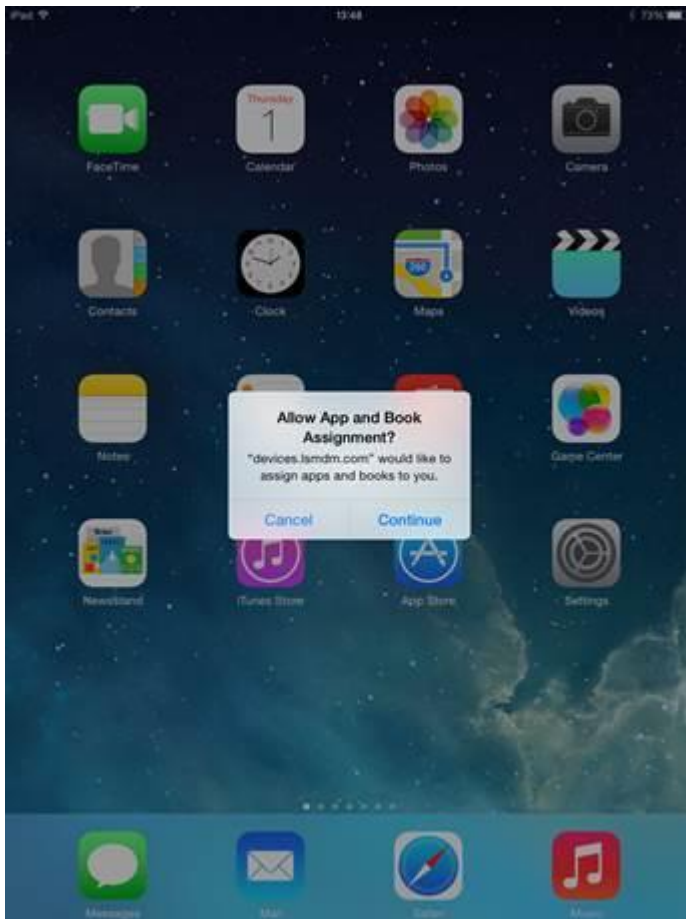

Note this step cannot be completed until an Apple ID and school email account have been configured.

To improve the distribution of centrally purchased apps to all iPads we now need to connect your iPad to our Managed App Distribution program. This will allow your device to receive apps distributed by the school and to enable you to keep them updated.

You will receive an email from Lightspeed inviting you to join our Managed App Distribution program.

And you will see a message on your iPad screen

If you do not see this message on your iPad screen then open the email on your iPad and click the link.

This is the command you will see on the iPad (Need to click Continue):

Note: Clicking this link does not purchase any apps or cost anything. It simply adds the device to the managed distribution program.

Note - you may be asked to input your Apple ID if you have not been on the App Store within the last 30 minutes
